PROPOSED · NOT BUILT

Call and Answer: one round, moment by moment

Version 2 of the proposed flow for a Call and Answer round in Engage. It answers the external review of session 7924 (the "Relay expansion" run, six rounds, four participants) and redraws the reviewers' concept with the team's decisions applied. Every screen below is a wireframe: it shows **what each surface shows, where things sit, and the one next step** at each moment. Colours and fonts are not the point.

Prepared 14 October 2026 for the product owner, then the external reviewers. Sample content is from the review session; names are the reviewers' fictional participants.

WHAT CHANGED SINCE THE REVIEWERS' VERSION

- **One "Ask the room" composer, two ways in.** Blank from the dock, or filled in by Workie from a small icon beside a point of the read. Same screen either way; the words are editable at once, then "Send to the room".
- **Your format cards are kept** as the composer's kind switch (Ideas, Choose, Rate, Comments). "Comments" replaces "Request feedback", so there is one door for asking the room anything.
- **The end of the read is a real stop.** On the last page the main button becomes "Ask the room". Mid-read, "Next round" needs a second press while questions are still unsent. Paging stays in the fixed button bar, because clickers and the Space key depend on it.
- **Labels stay short** ("Start voting", "Show results"). The status line beside them says what comes next, instead of long button labels. No six-step route strip; the status line and "Round 2 of 6" carry "where am I".
- **Nothing that arrives late is lost.** Late answers, ideas and comments are kept and marked "Not reviewed by the team" until the host reads them or shows them.
- **Anyone can go back to an earlier round and comment**, on their phone, laptop or tablet, or from the host's History. The wall shows nothing unless the host puts it up.
- **The report is a full record of each question for the room**: Workie's words against what was sent, where in the read it came from, timings, results and how many answered.
- **Kept from your version:** the real task on the wall, the room-screen choice before round 1, "Preparing questions" then "3 asks ready", "Checking your answer…" after a reload, and a privacy line for each kind.

00 How to read this page

Each moment shows the surfaces side by side. A coloured square in each caption says which surface it is. The **orange bar** above each row is the one next step for the host at that moment.

Host laptop
The host's main controls. A fixed button bar at the bottom: a status line, a second (quiet) button and one main button.

Host phone (Remote)
An optional remote control on the host's own phone. Same buttons, same rules as the laptop. It also carries the host-only notes.

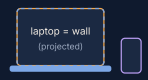

The wall (Presentation window)
What the room sees on the projector or TV. Never shows host controls, names in anonymous moments, or anything not yet sent.

Participant
Each person in the room, on their own phone, laptop or tablet. Drawn phone-sized; the same page fits a laptop or tablet.

Report
The session report the host opens, saves and shares after the session.

Two screens (the main reference here)
The laptop is the host's private dashboard. The room watches a separate Presentation window on a second screen, opened with "Open Present". Host-only things (Workie's reasons, the icons beside points, late items) stay on the laptop.

One screen (marked ONE SCREEN)
The laptop itself is projected, so the room sees whatever the laptop shows. The flow is the same, with less on the laptop: no icons beside points, Workie's reasons folded away, late items shown as a count until opened. The Remote, if open, carries the host-only detail.

Your proposals, and what this version does with them

YOUR PROPOSAL	HERE	WHY
Room-screen choice and "Open Present" before round 1	Kept	A "Room screen" choice in the lobby: "This laptop" or "A second window". No route-preview tutorial.
The team's real task visible on the wall in answering and voting	Kept	The task is the large line; the background story is the line that can be dropped for space.
"Preparing follow-up questions..." then "3 asks ready"	Kept	In the status line, with no jump in layout.
"Checking your saved reply..." after a reconnect	Kept	Shown only while the check is in flight; then the real answer.
Ask step with format cards, exact prompt, privacy line, and a skip	Merged	Becomes the one "Ask the room" composer. "Comments" folds in "Request feedback". The skip is the second button, "Next round".
Previous / Next pager inside the read card	Adapted	Paging stays in the button bar (clickers, Space key). The stop at the end of the read and the second press on "Next round" do the job you wanted.
Six-step route strip (Setup → ... → Wrap up)	Adapted	Too much on every screen. The status line already says where the room is and what comes next; "Round 2 of 6" is added where missing.
"Select for display & report" on Ideas	Adapted	Button stays "Put this on the wall". Proposed: the report lists every idea, marked shown or not shown (open question 1).
Wrap-up screen with a report preview	Later	The report itself states what it includes and leaves out, and lists the items not yet reviewed.
Long labels: "Close answers & start voting", "Send Ideas to room"	Not taken	Short labels, one label per action, the same on laptop and Remote. The status line names the effect.
"A preference, not a decision" standing panel	Not taken	Engage cannot know what a decision is. The host's "Said in the room" note is the honest place for it; results stay as counts.
—	New	Late items kept and labelled; "Earlier rounds" for everyone; the report's full record of each question.

01 The round, moment by moment

Round 2 of 6 of the review session. Four people are in the room: Maya, Theo, Lena and Omar. Two screens, with the Remote open; one-screen differences are noted under each moment.

0 Lobby, once per session

The room joins. The host chooses where the room will watch.

THE ONE NEXT STEP Choose the room screen, then **Start round 1**.

4 people here — Waiting for the host

PARTICIPANT · MAYA

Relay expansion — Maya

You're in.

The host will start the first round shortly.

One screen: "This laptop" is chosen, there is no "Open Present", and the laptop shows the join code and QR large, because it is the wall.

1 Answering

Everyone sees the team's real task. The roster ticks people off; a phone's receipt waits for the server's yes.

THE ONE NEXT STEP **Start voting** when the room has answered. With someone still writing, it needs a second press.

HOST LAPTOP

Round 2 of 6 · Meiji — Answering

The Meiji Restoration

THE TASK
Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

Maya	✓ *answered*	Theo	✓ *answered*
Lena	✓ *answered*	Omar	*writing…*

3 of 4 answered
Next on the screen: The answers, for voting

Skip this round | Start voting

After one press: "1 still answering. Press again to start voting." — Start voting

THE WALL

Round 2 · Answering — The Meiji Restoration

Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

In 1871 the new government abolished the domains its own samurai depended on… *(the story; dropped first when space is short)*

3 of 4 answered on their phone, laptop or tablet — Code 7924

PARTICIPANT · LENA

Round 2 — Earlier rounds

The Meiji Restoration

Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

The paper sign-off sheet. Supervisors lose a control they trust, so…

Saved. You can change it until voting starts.

Shown only after the server confirms it has the answer.

One screen: the laptop shows the wall's layout (task large) with the roster as ticks only, and the same button bar.

2 Voting, and a late answer arrives

Ballots show the full text of each response. Omar's answer reaches the server after voting started: it is kept, not thrown away.

THE ONE NEXT STEP **Show results** once the room has voted. **Next response** moves the wall through the answers.

HOST LAPTOP

Round 2 of 6 · Meiji — Voting

RESPONSE 1 OF 4

Retire the paper sign-off sheet, but only after Relay records who approved each job. Supervisors keep the control; they lose the paperwork.

Maya	✓ voted	Theo	✓ voted
Lena	✓ voted	Omar	voting...

3 of 4 voted · Showing response 1 of 4 · 1 late answer kept

Round 2 of 6 · What we heard — Page 6 of 6

Suggested next steps

1. Retire one workaround first, and pick it together.
2. Name the measure that would trigger the next stage.

Discussion prompt on screen
Next on the screen: Round 3

Ask the room | Next round

"Ask the room" replaces "Request feedback" as the second button. It opens the same composer, blank.

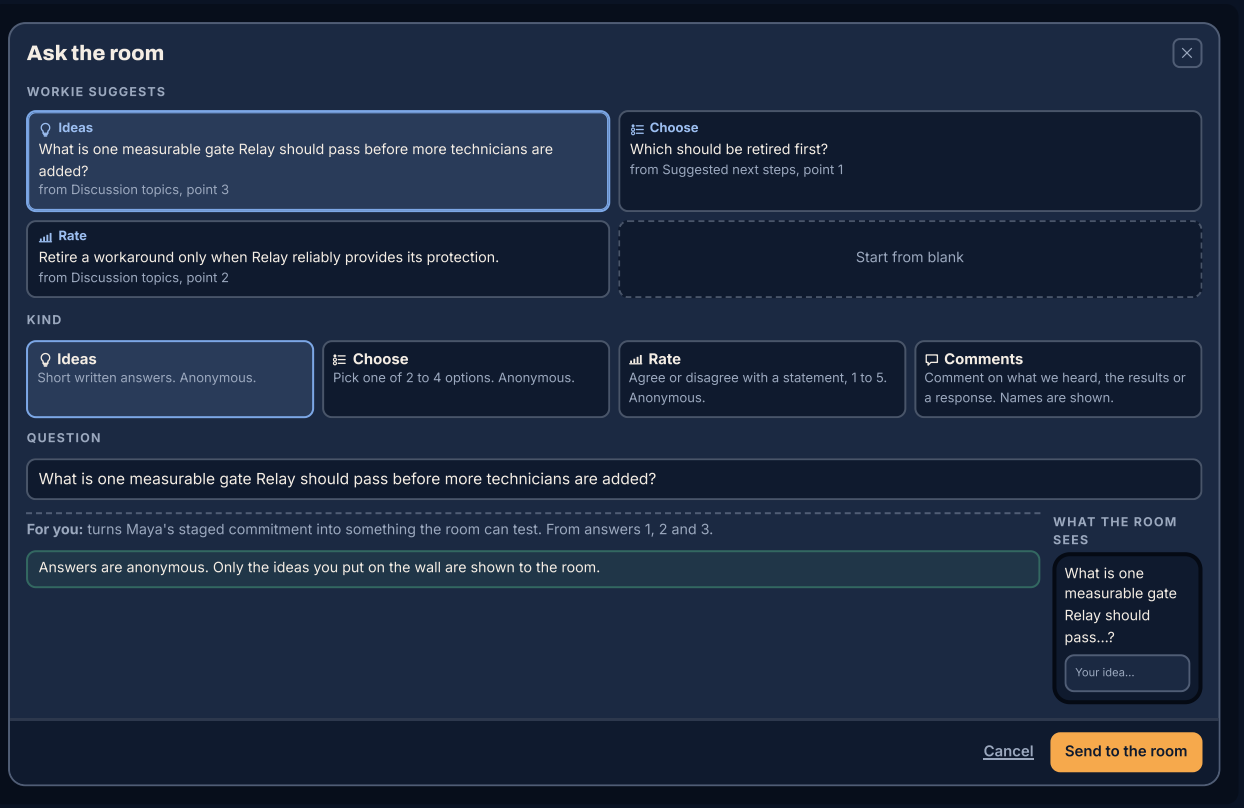

A clicker or the Space key on the last page opens the composer, never sends. Closing the composer without sending puts the bar back to "Ask the room / Next round". The wall stays on the last page throughout.

6 The composer

A dialog on the laptop, a full-height sheet on the Remote. Opened from the chip beside point 3, so Workie's Ideas question is already selected. Direction 1 below shows the blank way in and the edited state.

THE ONE NEXT STEP Read it, edit lightly if needed, then **Send to the room**.

HOST LAPTOP · DIALOG OVER THE READ

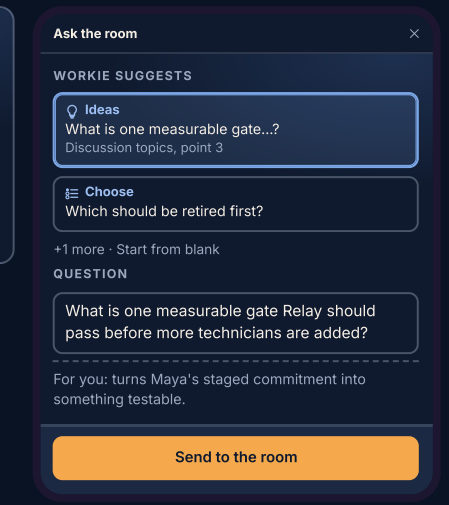

THE WALL

The room sees nothing until Send.

HOST PHONE (REMOTE) · SAME CONTENT, FULL-HEIGHT SHEET

One screen: the composer opens on the projected laptop, so the room sees the dialog itself. Workie's "For you" reason is folded behind "Why Workie suggests this", and the suggestion cards show only the question.

7 Question for the room, live

The room answers on their phones, laptops and tablets. Answers are anonymous.

THE ONE NEXT STEP **Show results** (a second press while people are still answering), or **Cancel the question**.

HOST LAPTOP

Round 2 of 6 · Question for the room — Ideas · live

Thank you for thinking together.

6 rounds completed

Comments stay open for 24 hours *(proposed)*

02 Direction 1 · One "Ask the room" composer, two ways in

Workie's suggested question is simply the normal ask, filled in. Both doors open the same screen. The words are editable at once (no separate Edit step), and the host sees what they changed before the room does.

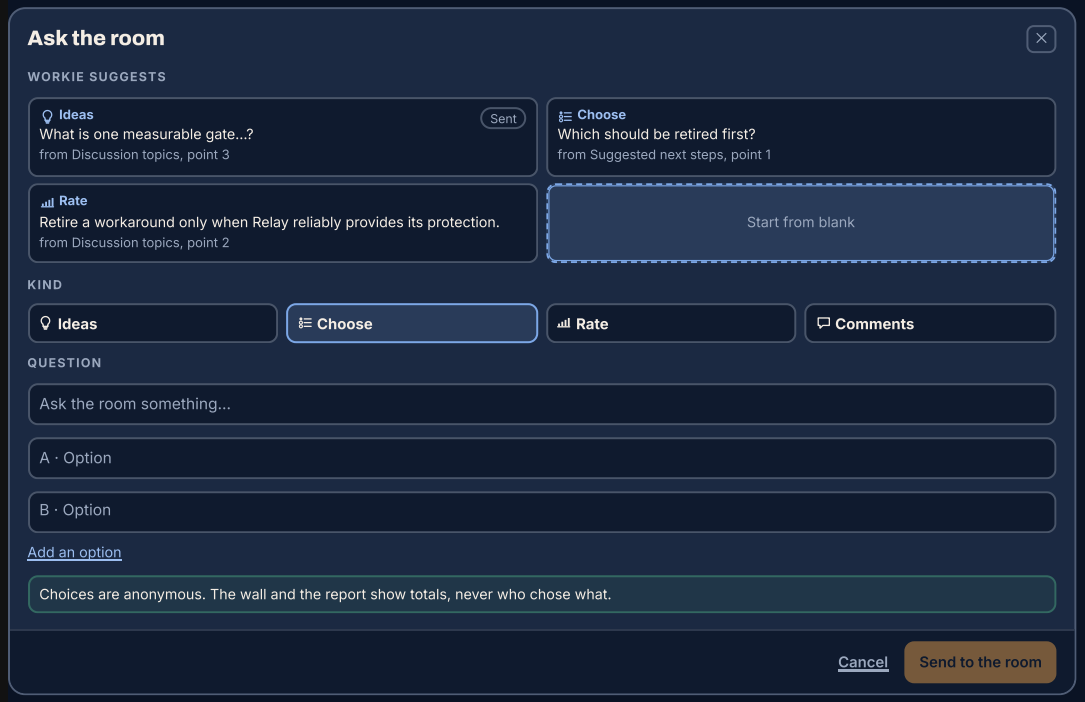

WAY IN A · FROM THE HOST
"Ask the room" in the button bar (main button on the last page, second button otherwise, "Ask another" after results). Opens with Workie's suggestions listed. If exactly one is unsent it is selected; otherwise nothing is selected and the form is blank.

→ **THE SAME COMPOSER**
Workie suggests · Kind · the words (editable) · For you · What the room sees · privacy line · **Send to the room**

WAY IN B · FROM WORKIE
The small chip beside a point of the read ("Ideas", "Choose", "Rate"). Opens with that suggestion filled in and selected.

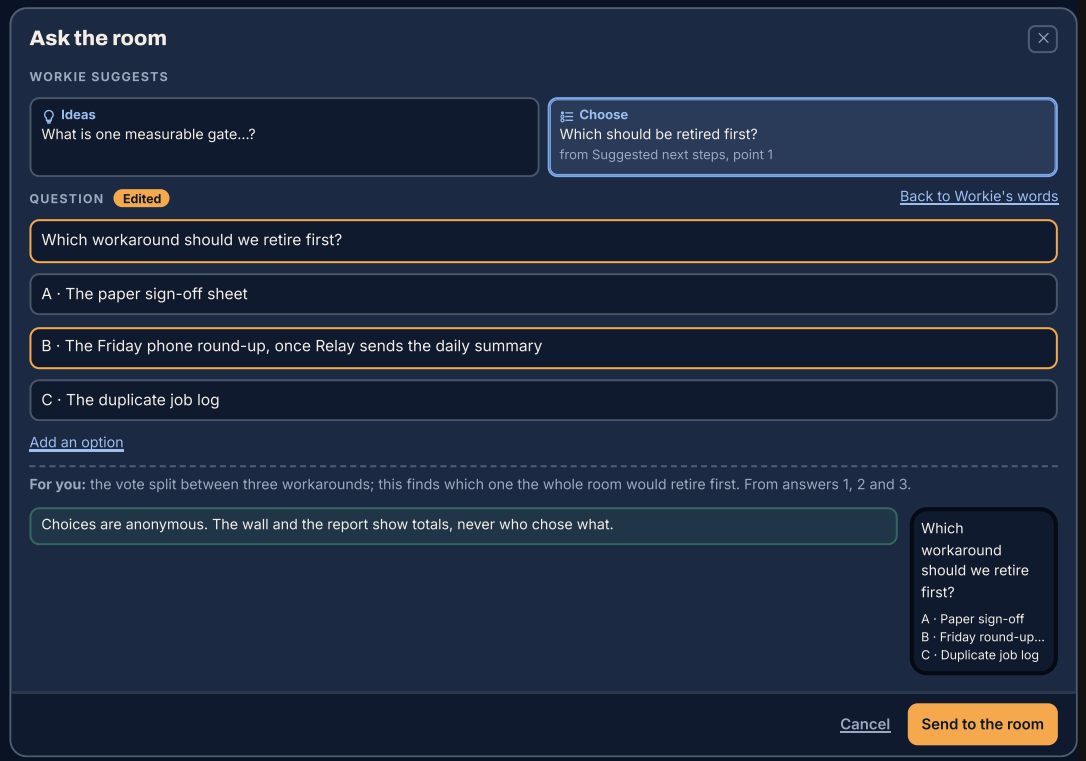

→ Same screen. The only difference is which card starts selected.

A · BLANK, FROM THE BUTTON BAR

Two suggestions are unsent, so nothing is pre-selected. A card already sent this round says "Sent". If Workie made nothing, the composer opens blank with no "Workie suggests" heading.

B · FILLED IN BY WORKIE, THEN LIGHTLY EDITED

Workie's option B was cut off mid-sentence in the review. Here the host completes it in place; the "Edited" chip and the report both record it.

COMMENTS KIND (REPLACES "REQUEST FEEDBACK")

Ask the room

Ideas | Choose | Rate | Comments

WHAT TO COMMENT ON (OPTIONAL)

e.g. "Is the read fair to the minority view?"

Names are shown with comments. You choose which comment goes on the wall.

Cancel | Send to the room

WHILE A QUESTION IS LIVE

Ask the room

Retire a workaround only when Relay reliably provides its protection.

Rate · 1 Disagree to 5 Agree

Cancel | Finish the open question first

If the laptop and the Remote both press Send, only one question goes live.

ONE SCREEN · COMPOSER ON THE PROJECTED LAPTOP

Ask the room

Ideas
What is one measurable gate...?

Choose
Which should be retired first?

What is one measurable gate Relay should pass before more technicians are added?

Why Workie suggests this

Cancel | Send to the room

The room can see this dialog, so the reason is folded away and there are no icons beside points. The Remote still shows both.

03 Direction 2 · The report records each question in full

A question for the room should be understandable months later, by someone who was not there. The report keeps Workie's original words beside what was actually sent, quotes the point of the read it came from (a point number means nothing once the read is redone), and says how many could answer.

REPORT · ROUND 2, "QUESTIONS FOR THE ROOM"

Round 2 · The Meiji Restoration

> **The task:** Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

Answers 4 · Ballots 4 · Names shown this round

Questions for the room

Ideas · from Discussion topics, point 3

"Maya Chen proposes a staged commitment ... Can we agree which gate ... would justify adding technicians?"

What is one measurable gate Relay should pass before more technicians are added?

Sent as Workie wrote it

Workie's reason: turns Maya's staged commitment into something the room can test · Drawn from answers 1, 2 and 3

Open 01:12–01:14 · 4 of 4 in the room answered · Sent from the laptop

Shown to the room (1): "In a limited next-stage trial, two weeks with no missed handovers."

Not shown (3):

- "Every technician can recover an offline job without calling the office."
- "An assignment owner named on every job before it starts."
- "Same-day fixes stay at today's rate or better."

Arrived late (1): "A month of clean audits first." Not reviewed by the team

Choose · from Suggested next steps, point 1

"Retire one workaround first, and pick it together."

Which workaround should we retire first?

Workie suggested: "Which should be retired first?", option B "The Friday phone round-up, once Relay" · Edited by the host (question, option B)

Open 01:15–01:16 · 4 of 4 in the room answered

A · The paper sign-off sheet **3** · B · The Friday phone round-up, once Relay sends the daily summary **0** · C · The duplicate job log **1**

Rate · written by the host

"Relay is ready for a second depot."

Open 01:17–01:17 · Cancelled by the host · 2 of 4 had answered

Added later

Lena Ortiz, on what we heard, 01:31: "The read leaves out that supervisors asked for the sign-off." Added later · Read by the host

This report includes every answer, ballot and question for the room, every idea (anonymous), and comments with their authors. It leaves out who chose what in Choose and Rate.

What each question records

LINE	WHAT IT ANSWERS
Kind · where from	Which point of the read, by section and number, plus the point's own words quoted.
The sent question	Exactly what the room saw, options included.
Workie suggested	Shown only when it differs. Then "Edited by the host (question, option B)". Otherwise "Sent as Workie wrote it", or "Written by the host".
Workie's reason	Why it was suggested, and which responses it drew on. Names only where the round showed names.
Timings	Opened, closed or cancelled.
How many answered	"4 of 4 in the room answered": the room's size when it was sent.
Results	Counts, average and spread, or the ideas in two groups (proposed: open question 1).
Arrived late	Kept, with its review label.

> Workie's words are copied onto the question when it is sent. If the read is redone later, the report still has the original.

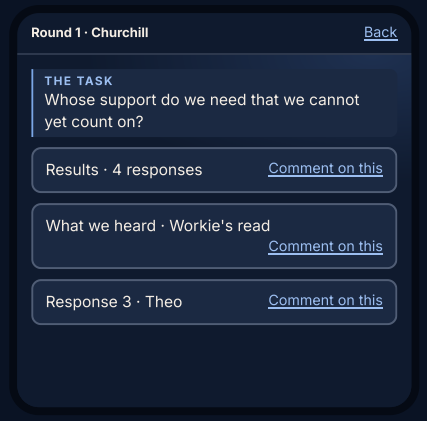

04 Direction 3 · Anyone can go back to an earlier round and comment

Participants get a quiet "Earlier rounds" link in the page header, never a main button. The host gets the same comment box in History. The wall shows nothing unless the host puts a comment up.

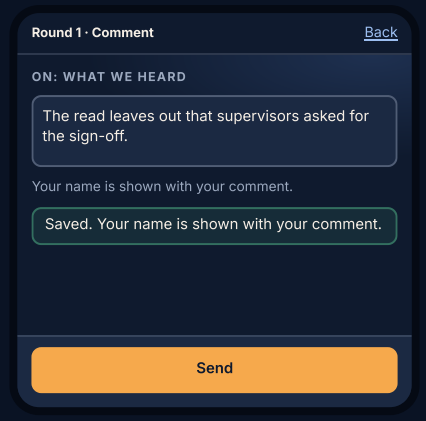

PARTICIPANT · 1. THE LIST

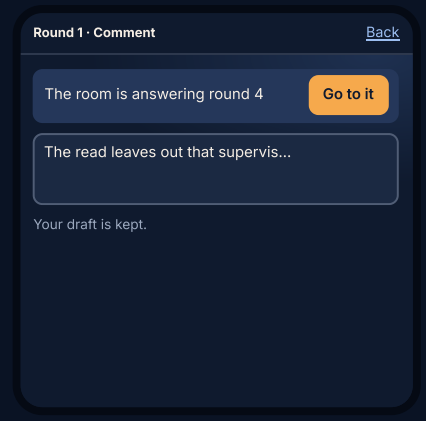

PARTICIPANT · 2. A ROUND

PARTICIPANT · 3. COMMENTING

PARTICIPANT · THE ROOM MOVES ON

HOST LAPTOP · HISTORY, ROUND 1

The "Said in the room" box is on every round in History and on any part of the current round's results. The Remote shows the same.

THE WALL · ONLY AFTER "SHOW ON THE WALL"

> Rounds that hide names keep them hidden here too: the anonymity rule applies per round. In the report, a comment added later sits in its own round with "Added later" and its review label.

05 Direction 4 · Late answers, ideas and comments are kept and labelled

"Late" means anything that reaches the server after its moment has closed. Today these are dropped or refused, and in one case the phone still shows a receipt. In this version they are kept with their round, never counted, voted on or added to Workie's read, and carry one of three labels everywhere.

The three labels (for late items only)

Not reviewed by the team	The default. Nobody has looked at it during the session.
Read by the host	The host opened it and pressed "Mark as read", but did not show it.
Shown to the room	The host put it on the wall. The only label that means the room saw it.

On-time items carry no label: they are already in the round. An on-time idea the host never picked is simply "Not shown", a different state.

What the writer sees

ITEM	LATE WHEN	THEIR PHONE, LAPTOP OR TABLET SAYS
Round answer	Voting has started	“Voting has started. Your answer is kept with this round, but it is not in the vote.”
Answer held while offline	Reconnects after the round moved on	The same line, with the round's name.
Answer to a question for the room	The results are up, or the round moved on	“The results are already up. Your answer is kept, but not in the count.”
Comment	The room has moved on	“Saved. Your name is shown with your comment.” Kept as "Added later".

A receipt appears only after the server says yes. The answer box stays open while someone is typing; Send still works after the moment closes.

HOST LAPTOP · THE COUNT IN THE STATUS LINE

3 of 4 voted · 1 late answer kept

Added later
Comment on round 1 · Lena Ortiz — Read by the host

Names follow each round's Names setting. Late items are never in the counts, votes or Workie's read.

The wall — Added later

Only when the host presses "Show on the wall": a small "Added later" label, and the round's name if it is not the current one.

06 Open questions for the owner

Each has a recommended answer, and the drawings above assume it. None is decided yet.

PROPOSED, PENDING THE OWNER

1. Ideas in the report: all of them, or only the picked ones?

List every idea, anonymous, in two groups: "Shown to the room" and "Not shown". Freeze them on the question when it closes so they outlast the short-lived answer rows. Keep the wall picked-only.

This differs from the reviewers' "selected only" reading. Today's product keeps only picked ideas.

PROPOSED, PENDING THE OWNER

2. On one screen, should questions for the room appear on the projected laptop?

Yes. Open the composer on the laptop and fold away Workie's "For you" reason. Also add the lobby's "Room screen" choice, so hosts find two screens without a hidden setting.

PROPOSED, PENDING THE OWNER

3. Does "Read by the host" count as reviewed?

Keep three distinct labels: "Not reviewed by the team", "Read by the host", "Shown to the room". Only "Shown to the room" means the room saw it.

PROPOSED, PENDING THE OWNER

4. How long after the session ends can people add comments or late answers?

Comments until 24 hours after the end, with a host button "Close comments" to end it sooner. A late answer to a round is accepted only while the session is running.

PROPOSED, PENDING THE OWNER

5. Should late answers ever reach Workie's read?

Not by default. They are listed beside the read, not in it. A host who wants them in presses Redo; the redone read includes them and says so in a line.

PROPOSED, PENDING THE OWNER

6. Offer "Ask the room" when Workie made no suggestions?

Yes: offer the blank composer whenever questions for the room are switched on for that environment. The switch itself stays as it is.

PROPOSED, PENDING THE OWNER

7. Replace "Request feedback" with the "Comments" kind inside Ask the room?

Yes. One door for asking the room anything. The composer states the difference: comments carry names; Ideas, Choose and Rate are anonymous.

PROPOSED, PENDING THE OWNER

8. Mid-read "Next round": a second press while questions are unsent, or move it into the session menu?

The second press. It keeps today's tap count for a host who wants to move on, and stops the accidental skip the reviewer hit in rounds 3 and 6.
