PROPOSED · NOT BUILT

Call and Answer: one round, moment by moment

Version 3 of the proposed flow for a Call and Answer round in Engage. It answers the external review of session 7924 (the "Relay expansion" run, six rounds, four participants) and redraws the reviewers' concept with the team's decisions applied. Every screen below is a wireframe: it shows **what each surface shows, where things sit, and the one next step** at each moment. Colours and fonts are not the point. Version 3 adds the owner's decisions of 14 October: the round's workflow is always on the host's screens, and setup helps the host choose how the room will watch.

Prepared 14 October 2026 for the product owner, then the external reviewers. Sample content is from the review session; names are the reviewers' fictional participants.

WHAT CHANGED SINCE THE REVIEWERS' VERSION

- **One "Ask the room" composer, two ways in.** Blank from the dock, or filled in by Workie from a small icon beside a point of the read. Same screen either way; the words are editable at once, then "Send to the room".
- **Your format cards are kept** as the composer's kind switch (Ideas, Choose, Rate, Comments). "Comments" replaces "Request feedback", so there is one door for asking the room anything.
- **The end of the read is a real stop.** On the last page the main button becomes "Ask the room". Mid-read, "Start round 3" (the next round, by number) needs a second press while questions are still unsent. Paging stays in the fixed button bar, because clickers and the Space key depend on it.
- **Your route strip is kept, redrawn.** One slim strip on the host's screens: Setup, the round's loop (Answer, Vote, What we heard, Ask), Finish. The current step is lit and a "Your part now" line names the main button. Labels stay short ("Start voting", "Show results").
- **The workflow can be looked at, not driven.** Pressing a step shows it privately; the room, the wall and the phones stay where they are, and "Back to the room" returns.
- **Nothing that arrives late is lost.** Late answers, ideas and comments are kept and marked "Not reviewed" until the host reviews them or reviews them with the room.
- **Anyone can go back to an earlier round, see all of it and comment**, on their phone, laptop or tablet, or from the host's Rounds menu. Each comment names its target. The wall shows nothing unless the host puts it up.
- **The report is a full record of each question for the room**: Workie's words against what was sent, where in the read it came from, timings, results and how many answered.
- **Kept from your version:** the real task on the wall, the room-screen choice before round 1 (now with "Help me pick"), settings that say when they apply, "Start round 3", "Preparing questions" then "3 asks ready", "Checking your answer..." after a reload, and a privacy line for each kind.

CHANGES SINCE VERSION 2

1. **The workflow is always on the host's screens.** A slim strip under the title bar on the laptop, a row of dots on the Remote, a slimmer strip on one screen. Never on the wall or the room's devices. (Version 2 had dropped it.)
2. **"Your part now".** The strip names what is expected of the host, in the same words as the main button. It adds no buttons.
3. **Look without moving the room.** Pressing a step opens a private view of it; an orange bar says where the room really is, and the main button becomes "Back to the room".
4. **Setup helps you pick the room screen.** The two drawings of one and two screens, a plain line for each, and "Help me pick": three questions, one recommendation.
5. **Players, Questions, Rounds, Settings** stay in reach on every host screen. Settings say when a change applies: now, from the next round, or not while the room is live.
6. **"Next round" names the round** ("Start round 3"), and Finish can be previewed privately before the session ends.
7. **Earlier rounds show the whole round** on phones, tablets and laptops: the question, your response, all responses by votes, Workie's read, questions for the room and all feedback. The host's Rounds menu shows the same.
8. **Comments say what they are about** ("[Theo commented on Maya's response]"), carry one of three labels (Reviewed with the room, Reviewed by the host, Not reviewed), and can be sent anonymously. Two report settings decide what the report includes.

00 How to read this page

Each moment shows the surfaces side by side. A coloured square in each caption says which surface it is. The **orange bar** above each row is the one next step for the host at that moment.

Host laptop
The host's main controls. Under the title bar, the workflow strip: where the round is and what is expected next. At the bottom, a fixed button bar: a status line, a second (quiet) button and one main button.

Host phone (Remote)
An optional remote control on the host's own phone. Same buttons, same rules as the laptop, and the same workflow as a row of dots. It also carries the host-only notes.

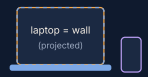

The wall (Presentation window)
What the room sees on the projector or TV. Never shows host controls, names in anonymous moments, or anything not yet sent.

Participant
Each person in the room, on their own phone, laptop or tablet. Drawn phone-sized; the same page fits a laptop or tablet.

Report
The session report the host opens, saves and shares after the session.

Two screens (the main reference here)
The laptop is the host's private dashboard. The room watches a separate Presentation window on a second screen, opened with "Open Present". Host-only things (Workie's reasons, the icons beside points, late items) stay on the laptop.

One screen (marked ONE SCREEN)
The laptop itself is projected, so the room sees whatever the laptop shows. The flow is the same, with less on the laptop: no icons beside points, Workie's reasons folded away, late items shown as a count until opened. The Remote, if open, carries the host-only detail.

> These two drawings now also appear in setup, where the host chooses the room screen (moment 0 below).

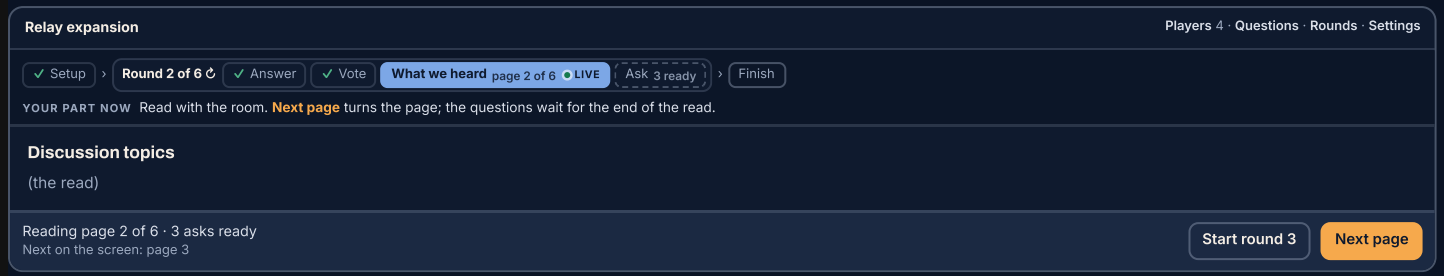

Your proposals, and what this version does with them

YOUR PROPOSAL	HERE	WHY
Room-screen choice and "Open Present" before round 1	Kept	Setup asks "Where will the room watch?" with the one- and two-screen drawings, a plain line for each, and "Help me pick" (three questions, one recommendation). No separate route-preview tutorial: the workflow strip shows the route.
The team's real task visible on the wall in answering and voting	Kept	The task is the large line; the background story is the line that can be dropped for space.
"Preparing follow-up questions..." then "3 asks ready"	Kept	In the status line, with no jump in layout.
"Checking your saved reply..." after a reconnect	Kept	Shown only while the check is in flight; then the real answer.
Ask step with format cards, exact prompt, privacy line, and a skip	Merged	Becomes the one "Ask the room" composer. "Comments" folds in "Request feedback". The skip is the second button, "Start round 3".
Previous / Next pager inside the read card	Adapted	Paging stays in the button bar (clickers, Space key). The stop at the end of the read and the second press on "Next round" do the job you wanted.
Six-step route strip (Setup → ... → Wrap up)	Kept	Reversed from version 2 at the owner's request. Redrawn as one slim strip: Setup › Round 2 of 6 (Answer · Vote · What we heard · Ask) › Finish. Done steps ticked, the live step lit, "Your part now" names the main button. Laptop: full strip. Remote: a row of dots. One screen: a slimmer strip. Never on the wall or the room's devices.
Owner's update: the workflow is navigation; the room keeps its place (LIVE marker, "Return to live room")	Kept	Steps can be pressed to look, never to act. Looking shows the step privately with an orange "Viewing ..." bar, and the main button becomes "Back to the room". On one screen, look from the Remote instead (the laptop is the wall).
Owner's update: Players, Questions, Rounds and Settings always visible	Kept	Drawn as one row in the laptop's title bar, so the read keeps its width. A left sidebar works as well on wide laptops.
Owner's update: settings that state their scope ("applies now", "future picks", "locked while live")	Kept	Every setting says when it takes effect. The current question, its answers and its ballots are never reopened by a settings change.
Owner's update: "Start round 3" instead of "Next round"	Kept	Still short, and it names the round. Matches "Start round 1" in the lobby.
Owner's update: "Show this view on Present / Restore live display"	Kept	While looking at an earlier step, a quiet "Show this on the wall" puts it up again, labelled; "Back to the live screen" restores it. It never reopens answers or votes.
"Select for display & report" on Ideas	Adapted	Button stays "Put this on the wall". Proposed: the report lists every idea, marked shown or not shown (open question 1).
Wrap-up screen with a report preview	Kept	Changed from "Later" by the owner's update. Pressing Finish in the strip shows a private preview of the report so far; "Finish the session" is the separate act. The report itself still states what it includes and leaves out.
Long labels: "Close answers & start voting", "Send Ideas to room"	Not taken	Short labels, one label per action, the same on laptop and Remote. The status line names the effect.
"A preference, not a decision" standing panel	Not taken	Engage cannot know what a decision is. The host's "Said in the room" note is the honest place for it; results stay as counts.
—	New	Late items kept and labelled; "Earlier rounds" for everyone; the report's full record of each question; "Help me pick" for the room screen.

01 The workflow strip: where I am, and what is expected of me

The owner, on the updated spec: the host should "know where i am and what is expected of me" at every moment. Version 3 puts the round's workflow on the host's screens at all times, in one slim strip. It works with the button bar, not beside it: the strip says where the round is and what the host is expected to do; the status line gives the live counts; the one main button does it.

HOST LAPTOP · THE STRIP, UNDER THE TITLE BAR

Setup and Finish
Once per session, outside the loop. Setup is ticked once round 1 starts.

The round's loop
"Round 2 of 6 ↻": Answer · Vote · What we heard · Ask. The same four steps every round.

Done, live, still to come
Done steps are ticked. The live step is filled, with a live dot and its page or count. Ask is dashed: it is optional.

Your part now
One line naming what is expected, in the main button's exact words (orange, like the button).

Host only
Never on the wall, never on a phone, laptop or tablet in the room.

Pointing at a step explains it

Ask (optional)
Ask the room a question: Ideas, Choose, Rate or Comments. Workie has 3 ready. You reach it from the button bar at the end of the read, or from the small icons beside its points. Pressing here shows the step; it sends nothing.

Hover on the laptop, a long press on the Remote. The same words as the step's place in the button bar.

Vote (done)
4 of 4 voted. Press to look at the ballots again. The room stays where it is.

Can a step be pressed?

Yes, but only to **look**. Pressing a step opens a private view of it: an earlier step shows what happened, Setup shows the session's settings, Finish shows a preview of the report, a later step explains what will happen. Nothing is sent, opened or closed. Every act that changes the room stays in the one button bar. This follows the owner's updated spec ("a viewed step is not a command to rewind participants").

While looking

An orange bar under the strip says "Viewing Setup · the room is still on round 2, What we heard, page 4". The step being looked at has an orange dashed outline; the live step keeps its live dot. The main button becomes **"Back to the room"**, which returns to the live view on the same page. The wall and every phone, laptop and tablet stay on the live step.

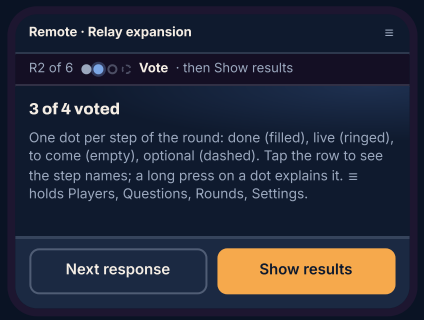

How it fits the button bar

Strip: where the round is, and what is expected of the host (fixed words per step). **Status line:** the live counts and what the room will see next ("3 of 4 voted · Next on the screen: the results"). **Main button:** the one act. "Your part now" always ends with the main button's label, so the eye goes from the strip to the button.

HOST LAPTOP · TWO SCREENS, FULL STRIP

HOST PHONE (REMOTE) · THE SAME, AS DOTS

ONE SCREEN · THE PROJECTED LAPTOP, SLIM STRIP

Recommended: keep it, slimmer. It reveals nothing private and helps the room follow too. No "Your part now" line (it would talk to the host in front of the room), and pressing a step only explains it. Looking at other steps happens on the Remote, which is private.

Looking without moving the room

The room is on round 2, What we heard, page 4. The host presses Setup in the strip to fix the session name and check the categories for later rounds.

HOST LAPTOP · VIEWING SETUP

Viewing Answer · the room is still on What we heard, page 4 — Back to the room

THE TASK
Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

Maya	✓ answered	Theo	✓ answered
Lena	✓ answered	Omar	✓ late, kept

Show this on the wall — Puts the task back up, labelled "Shown again". It does not reopen answers.

Viewing Answer · the room is on What we heard, page 4
Nothing you do here moves the room — Show this on the wall | Back to the room

After "Show this on the wall", the status line reads "The wall is showing round 2's task · Back to the live screen". The phones do not move.

HOST LAPTOP · VIEWING FINISH (A PREVIEW)

Relay expansion — Players 4 · Questions · Rounds · Settings

✓ Setup › Round 2 of 6 ↻ | ✓ Answer | ✓ Vote | What we heard page 4 of 6 LIVE | Ask › Finish VIEWING

Viewing Finish · a preview: the session has not ended — Back to the room

The report so far

Answers and ballots so far	8 / 8
Workie's reads so far	2
Questions for the room	2 · 4 ideas, 1 shown

Includes every answer, ballot and question for the room, every idea (anonymous) and comments with their authors. Leaves out who chose what in Choose and Rate.

Viewing Finish · the room is on What we heard, page 4
Nothing you do here moves the room — Finish the session | Back to the room

Looking at Finish never ends the session. "Finish the session" asks once ("End the session for everyone?") and then opens the report.

Where this departs from earlier advice. Version 2 dropped the strip as clutter; the owner reversed that, and version 3 follows the owner. The brief for this version suggested steps should not navigate at all; the owner's updated spec makes them navigation. Version 3 follows the spec, limited to looking: every act stays in the one button bar, and "Back to the room" is always the main button while looking.

02 The round, moment by moment

Round 2 of 6 of the review session. Four people are in the room: Maya, Theo, Lena and Omar. Two screens, with the Remote open; one-screen differences are noted under each moment. The workflow strip sits under every laptop title bar.

0 Setup: where will the room watch?

The first thing the host sees on launching a session. The two drawings that explain the display types become the choice itself, with a plain line each and a "Help me pick" link.

THE ONE NEXT STEP Pick a room screen (or press "Help me pick"). With two screens, Open Present and drag it onto the projector.

HOST LAPTOP · THE CHOICE

Relay expansion — Players 4 · Questions · Rounds · Settings

Setup LIVE › Round 1 of 6 ↻ | Answer | Vote | What we heard | Ask › Finish

YOUR PART NOW Choose where the room watches, then **Start round 1** when people have joined.

Where will the room watch?

Two screens

The room watches a second window on the projector or TV. This laptop stays yours: Workie's notes, the icons beside points and late items stay private.

Open Present

One screen

The projector shows this laptop. Quick to set up, but the room sees everything on it. Your phone's Remote can hold the private notes.

Help me pick This browser remembers your choice. Change it any time in Setup or Settings.

Two screens · Present not open yet
Next: open Present and move it onto the projector

Back to menu | Start round 1

HOST LAPTOP · "HELP ME PICK", ANSWERED

Relay expansion — Players 4 · Questions · Rounds · Settings

Setup LIVE › Round 1 of 6 ↻ | Answer | Vote | What we heard | Ask › Finish

YOUR PART NOW Answer three questions; Engage recommends one. Then **Start round 1**.

Help me pick — Back to the two choices

1. **Is this laptop connected to the projector or TV?**
   Yes, by cable or wirelessly | Not yet
2. **Does the projector show its own picture, or a copy of your laptop's screen?**
   Its own (extended) | A copy (mirrored) | Not sure
3. **Should Workie's notes and suggestions stay private to you?**
   Yes | It doesn't matter

We recommend two screens. Press Open Present, drag the new window onto the projector and make it full screen. When the room can see the join code, you are ready.

Use two screens

Help me pick · 3 of 3 answered
Nothing changes until you choose

Back to menu | Start round 1

How "Help me pick" decides

ANSWERS	RECOMMENDATION
Connected, its own picture	**Two screens.** Open Present and drag it across.
Connected, a copy	**One screen.** If notes should stay private, open the Remote on your phone.
Connected, not sure	**Try two screens.** Press Open Present. If the window will not move onto the projector, choose one screen.
Not connected yet	**One screen for now.** Switch in Setup once the projector is plugged in.

Question 3 changes only the wording: when privacy does not matter, one screen is presented as the simpler choice.

Send

8 Question results

The host sees every idea and picks which go on the wall. The wall shows counts or picked ideas, never a name. A reply that comes in after the results went up is kept, marked late.

THE ONE NEXT STEP **Start round 3**, or **Ask another question** (reopens the composer with the two questions still unsent).

HOST LAPTOP

Relay expansion — Players 4 · Questions · Rounds · Settings

✓ Setup › **Round 2 of 6** ✓ Answer ✓ Vote ✓ What we heard **Ask results LIVE** › Finish

YOUR PART NOW Pick the ideas to show. Then **Start round 3**, or ask another question.

- In a limited next-stage trial, two weeks with no missed handovers. — Take it off the wall
- Every technician can recover an offline job without calling the office. — Put this on the wall
- An assignment owner named on every job before it starts. — Put this on the wall
- Same-day fixes stay at today's rate or better. — Put this on the wall
- Late — A month of clean audits first. — Put this on the wall

1 late answer · not in the count

Results are on screen
Next on the screen: Round 3

Ask another question | **Start round 3**

THE WALL

The room's answer · Ideas — Round 2

What is one measurable gate Relay should pass before more technicians are added?

In a limited next-stage trial, two weeks with no missed handovers.

4 ideas · 1 shown — No names

Choose shows bars and counts; Rate shows the average and the spread.

PARTICIPANT · OMAR, REPLIED LATE

Question for the room — Earlier rounds

What is one measurable gate…?

A month of clean audits first.

The results are already up. Your answer is kept, but not in the count.

THE ROOM'S ANSWER

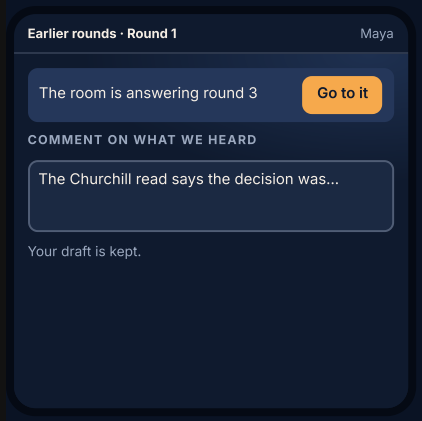

In a limited next-stage trial, two weeks with no missed handovers.

9 Round 3, and the end of the session

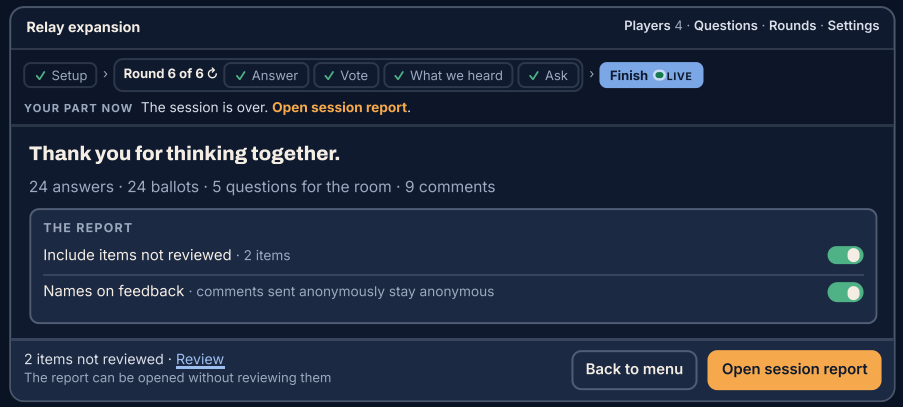

The same sequence starts again. Someone still writing a comment on an earlier round is told and keeps the draft. At the end, unreviewed items are counted but never block the report.

THE ONE NEXT STEP Each round: the same steps. At the end: **Open session report**.

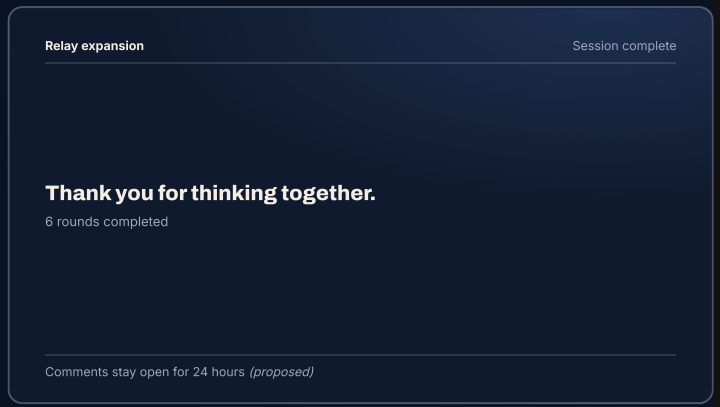

PARTICIPANT · MAYA, IN AN EARLIER ROUND

HOST LAPTOP · SESSION ENDED

THE WALL

03 Direction 1 · One "Ask the room" composer, two ways in

Workie's suggested question is simply the normal ask, filled in. Both doors open the same screen. The words are editable at once (no separate Edit step), and the host sees what they changed before the room does.

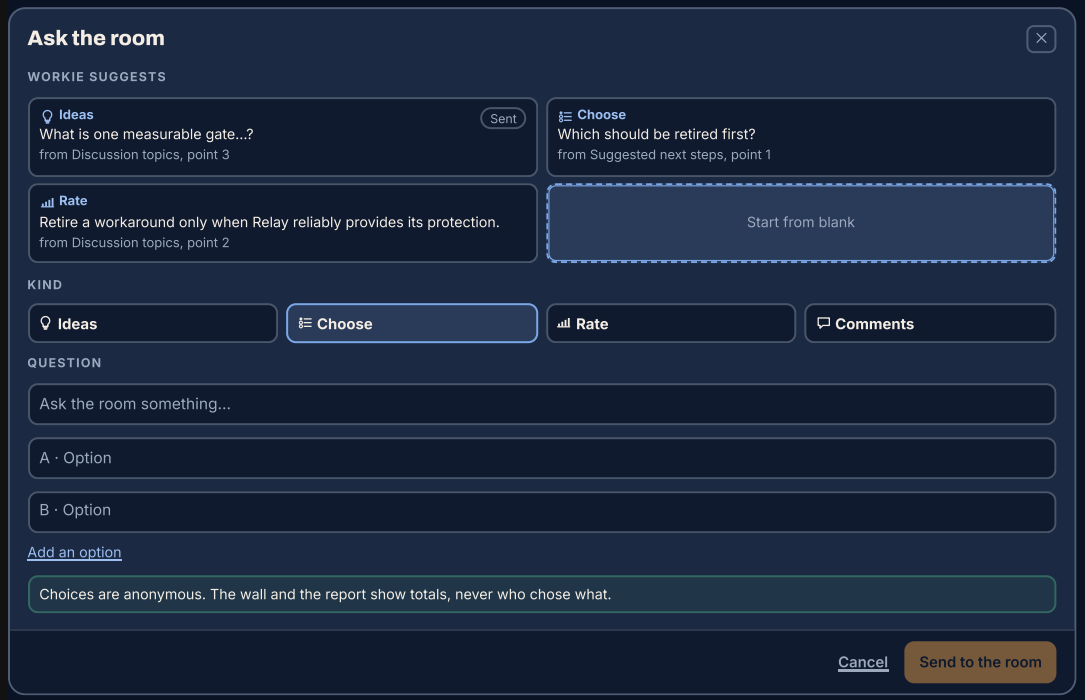

WAY IN A · FROM THE HOST
"Ask the room" in the button bar (main button on the last page, second button otherwise, "Ask another question" after results). Opens with Workie's suggestions listed. If exactly one is unsent it is selected; otherwise nothing is selected and the form is blank.

→ **THE SAME COMPOSER**
Workie suggests · Kind · the words (editable) · For you · What the room sees · privacy line · **Send to the room**

WAY IN B · FROM WORKIE
The small chip beside a point of the read ("Ideas", "Choose", "Rate"). Opens with that suggestion filled in and selected.

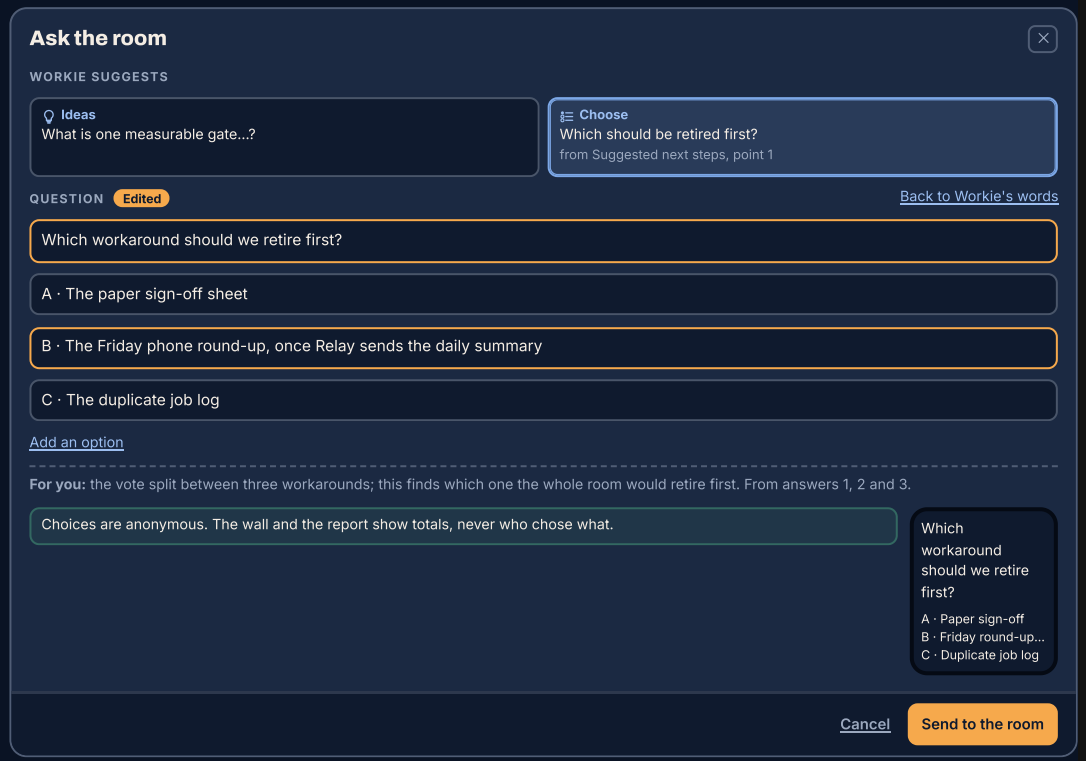

→ Same screen. The only difference is which card starts selected.

A · BLANK, FROM THE BUTTON BAR

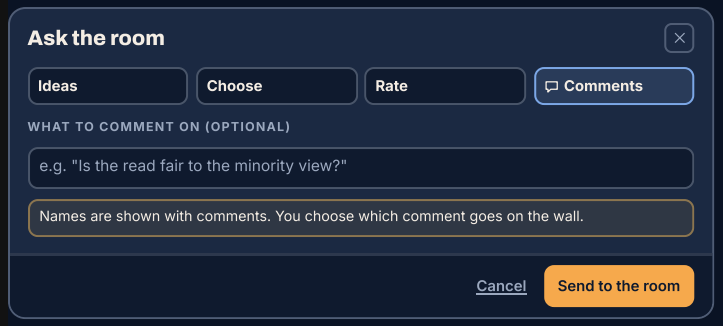

Two suggestions are unsent, so nothing is pre-selected. A card already sent this round says "Sent". If Workie made nothing, the composer opens blank with no "Workie suggests" heading.

B · FILLED IN BY WORKIE, THEN LIGHTLY EDITED

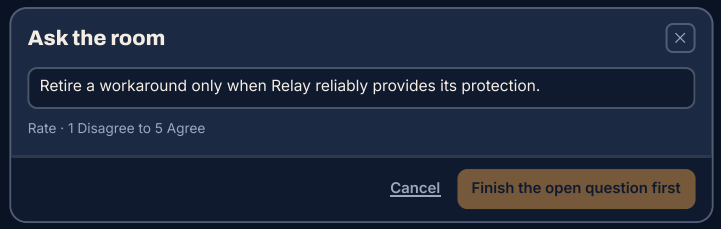

Workie's option B was cut off mid-sentence in the review. Here the host completes it in place; the "Edited" chip and the report both record it.

COMMENTS KIND (REPLACES "REQUEST FEEDBACK")

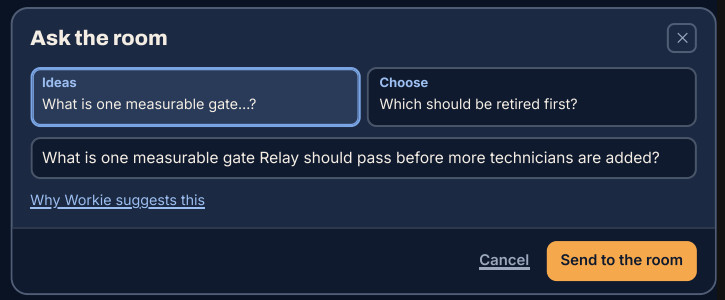

WHILE A QUESTION IS LIVE

If the laptop and the Remote both press Send, only one question goes live.

ONE SCREEN · COMPOSER ON THE PROJECTED LAPTOP

The room can see this dialog, so the reason is folded away and there are no icons beside points. The Remote still shows both.

04 Direction 2 · The report records each question in full

A question for the room should be understandable months later, by someone who was not there. The report keeps Workie's original words beside what was actually sent, quotes the point of the read it came from (a point number means nothing once the read is redone), and says how many could answer.

REPORT · ROUND 2, "QUESTIONS FOR THE ROOM"

Round 2 · The Meiji Restoration

> **The task:** Which long-standing process or structure must be dismantled, who benefits, and how do we bring them with us?

Answers 4 · Ballots 4 · Names shown this round

Questions for the room

Ideas · from Discussion topics, point 3

"Maya Chen proposes a staged commitment ... Can we agree which gate ... would justify adding technicians?"

What is one measurable gate Relay should pass before more technicians are added?

Sent as Workie wrote it

Workie's reason: turns Maya's staged commitment into something the room can test · Drawn from answers 1, 2 and 3

Open 01:12–01:14 · 4 of 4 in the room answered · Sent from the laptop

Shown to the room (1): "In a limited next-stage trial, two weeks with no missed handovers."

Not shown (3):

- "Every technician can recover an offline job without calling the office."
- "An assignment owner named on every job before it starts."
- "Same-day fixes stay at today's rate or better."

Arrived late (1): "A month of clean audits first." Not reviewed

Choose · from Suggested next steps, point 1

"Retire one workaround first, and pick it together."

Which workaround should we retire first?

Workie suggested: "Which should be retired first?", option B "The Friday phone round-up, once Relay" · Edited by the host (question, option B)

Open 01:15–01:16 · 4 of 4 in the room answered

A · The paper sign-off sheet **3** · B · The Friday phone round-up, once Relay sends the daily summary **0** · C · The duplicate job log **1**

Rate · written by the host

"Relay is ready for a second depot."

Open 01:17–01:17 · Cancelled by the host · 2 of 4 had answered

Comments

[Theo commented on Maya's response]: "I like this: the supervisors keep the control and lose only the paperwork." Reviewed with the room

[Lena Ortiz commented on What we heard]: "The read leaves out that supervisors asked for the sign-off." Added later · Reviewed by the host

[Maya commented on Lena's comment]: "They did, in the March meeting." Not reviewed

[Anonymous commented on the question]: "The task assumes something must be dismantled." Not reviewed

Report settings: items not reviewed included (2) · names on feedback. This report includes every answer, ballot and question for the room, every idea (anonymous), and comments with their authors unless sent anonymously. It leaves out who chose what in Choose and Rate.

What each question records

LINE	WHAT IT ANSWERS
Kind · where from	Which point of the read, by section and number, plus the point's own words quoted.
The sent question	Exactly what the room saw, options included.
Workie suggested	Shown only when it differs. Then "Edited by the host (question, option B)". Otherwise "Sent as Workie wrote it", or "Written by the host".
Workie's reason	Why it was suggested, and which responses it drew on. Names only where the round showed names.
Timings	Opened, closed or cancelled.
How many answered	"4 of 4 in the room answered": the room's size when it was sent.
Results	Counts, average and spread, or the ideas in two groups (proposed: open question 1).
Arrived late	Kept, with its review label.

> Workie's words are copied onto the question when it is sent. If the read is redone later, the report still has the original.

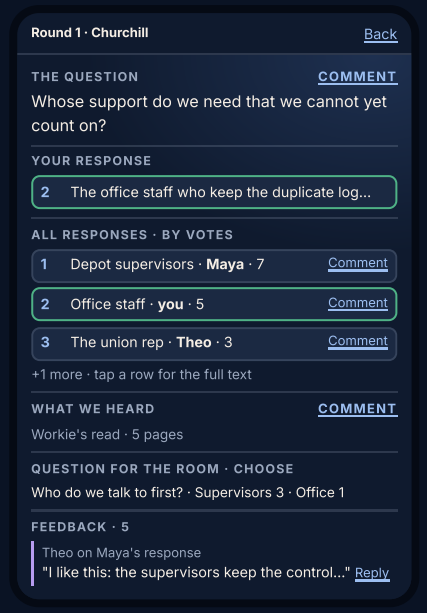

05 Direction 3 · Earlier rounds: the whole round, for everyone

The owner, 14 October: participants should be able to go back to any earlier round and "see all of the data": the question, their own response, all responses in the order the vote ranked them, Workie's read, any questions for the room with their results, and all feedback. They can comment on any of it, and every comment says what it is about. The host's Rounds menu shows the same round, feedback included. A quiet "Earlier rounds" link in the page header opens it; it is never a main button, and the wall shows nothing unless the host puts something up.

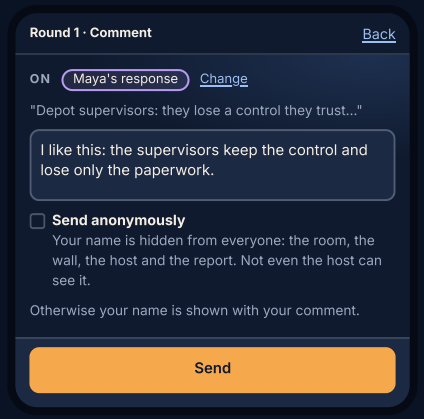

PARTICIPANT · PHONE, 1. THE LIST

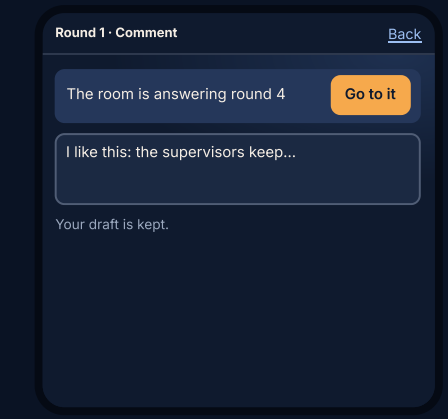

PARTICIPANT · PHONE, 2. THE ROUND (SCROLLS)

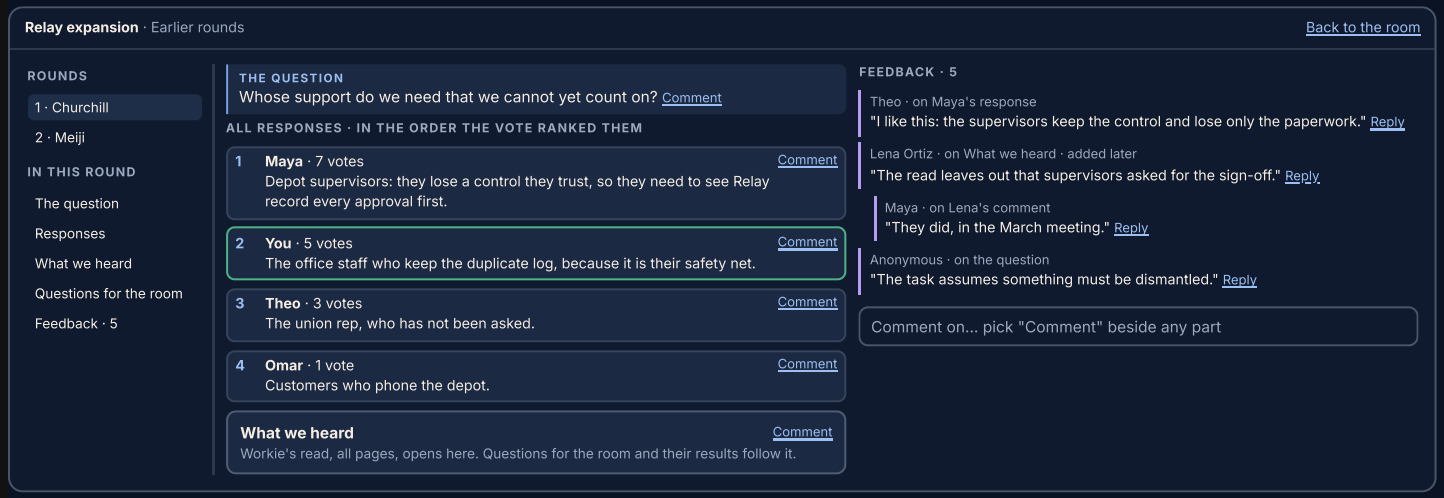

PARTICIPANT · PHONE, 3. COMMENTING

PARTICIPANT · THE ROOM MOVES ON

PARTICIPANT · TABLET OR LAPTOP, THE SAME ROUND WITH ROOM TO READ

Phone: one column, sections in this order, each folded to a line until tapped. Tablet and laptop: the round's parts on the left, the content in the middle, its feedback beside it. Review labels are host-only and never shown here.

What a comment can be about

THE COMMENTER PICKS	THE REPORT SAYS
The question (the task)	[Jake commented on the question]
A response	[Jake commented on Maria's response] · in a round that hides names: [Jake commented on Response 3]
Workie's read	[Jake commented on What we heard]
Another comment (a reply)	[Jake commented on Lena's comment] · or "on an anonymous comment"
A question for the room	[Jake commented on the question for the room "Who do we talk to first?"]

The format is the owner's: [who commented on what]: "the words". "Comment" sits beside each part, so the target is set by where the person pressed; "Change" on the comment box lets them pick again.

HOST LAPTOP · ROUNDS › ROUND 1, WITH ITS FEEDBACK

Relay expansion — Players 4 · Questions · Rounds · Settings

SAID IN THE ROOM

Note what the room agreed or left open about round 1...

"Show on the wall" makes it "Reviewed with the room"; "Mark reviewed" makes it "Reviewed by the host". The Remote shows the same list.

THE WALL · ONLY AFTER "SHOW ON THE WALL"

A comment from the room — On round 1 · Added later

On Maya's response · Churchill Bets Britain on an Unproven Ally

"I like this: the supervisors keep the control and lose only the paperwork."

Theo

Anonymous comments show no name, here or anywhere — Round 3 continues after

Rounds that hide names keep them hidden here too ("On Response 3"): the anonymity rule applies per round. In the report each comment sits in its round with its "[who on what]" line and its review label.

Report settings: what the report includes

HOST LAPTOP · SETTINGS › REPORT

Settings · Report — applies to the report

Include items not reviewed — toggle on
On by default. When off, the report leaves out comments and late items marked "Not reviewed", and says how many it left out.

Names on feedback — toggle on
On by default: comments carry their writer's name. Off: all feedback in this session is anonymous, on the wall and in the report, and each comment box says so.

Shown again beside "Open session report" at the end of the session.

REPORT · WITH "INCLUDE ITEMS NOT REVIEWED" OFF

Comments

[Theo commented on Maya's response]: "I like this..." (Reviewed with the room)

[Lena Ortiz commented on What we heard]: "The read leaves out..." (Reviewed by the host)

2 comments not reviewed are left out of this report, at the host's choice.

Anonymous, two ways

The host can make all feedback anonymous for the session. **A participant** can tick "Send anonymously" on any one comment. Either way the name is hidden everywhere, the host's own screens included, and is not kept with the comment, so it cannot be shown later.

06 Direction 4 · Late answers, ideas and comments are kept and labelled

"Late" means anything that reaches the server after its moment has closed. Today these are dropped or refused, and in one case the phone still shows a receipt. In this version they are kept with their round, never counted, voted on or added to Workie's read, and carry one of three labels everywhere.

The three labels (the owner's words; for comments and late items)

Not reviewed	The default. Nobody has reviewed it during the session.
Reviewed by the host	The host opened it and pressed "Mark reviewed", but did not put it on the wall.
Reviewed with the room	The host put it on the wall. The only label that means the room saw it.

On-time answers and ideas carry no label: they are already in the round. Every comment carries one. An on-time idea the host never picked is simply "Not shown", a different state.

What the writer sees

ITEM	LATE WHEN	THEIR PHONE, LAPTOP OR TABLET SAYS
Round answer	Voting has started	“Voting has started. Your answer is kept with this round, but it is not in the vote.”
Answer held while offline	Reconnects after the round moved on	The same line, with the round's name.
Answer to a question for the room	The results are up, or the round moved on	“The results are already up. Your answer is kept, but not in the count.”
Comment	The room has moved on	“Saved. Your name is shown with your comment.” Kept as "Added later".

A receipt appears only after the server says yes. The answer box stays open while someone is typing; Send still works after the moment closes.

HOST LAPTOP · THE COUNT IN THE STATUS LINE

3 of 4 voted · 1 late answer kept
The count opens the late list. No new button.
Next response | Show results

2 items not reviewed · Review
At the end of the session
Open session report

One screen: the laptop shows only the count until the host opens the list, because the room is watching.

HOST LAPTOP · THE LATE LIST, IN HISTORY

Relay expansion — Players 4 · Questions · Rounds · Settings

Setup › Round 3 of 6 | Answer LIVE | Vote | What we heard | Ask › Finish

Viewing Rounds › Arrived late · 3 items · the room is answering round 3 — Back to the room

ROUND 2 · THE MEIJI RESTORATION

Answer · during voting · 01:09 — Not reviewed
"The Friday phone round-up. Nobody owns it, so..." · Omar
Show on the wall | Mark reviewed

Idea · after results · 01:14 — Reviewed with the room
"A month of clean audits first."

ROUND 1 · CHURCHILL

Not reviewed

Idea, after results: "A month of clean audits first."
Reviewed with the room

Added later
Comment on round 1 · Lena Ortiz — Reviewed by the host

Names follow each round's Names setting. Late items are never in the counts, votes or Workie's read.

The wall — Added later

Only when the host presses "Show on the wall": a small "Added later" label, and the round's name if it is not the current one.

07 Open questions for the owner

Each has a recommended answer, and the drawings above assume it. None is decided yet.

PROPOSED, PENDING THE OWNER

1. Ideas in the report: all of them, or only the picked ones?

List every idea, anonymous, in two groups: "Shown to the room" and "Not shown". Freeze them on the question when it closes so they outlast the short-lived answer rows. Keep the wall picked-only.

This differs from the reviewers' "selected only" reading. Today's product keeps only picked ideas.

PROPOSED, PENDING THE OWNER

2. On one screen, should questions for the room appear on the projected laptop?

Yes. Open the composer on the laptop and fold away Workie's "For you" reason. Also add the lobby's "Room screen" choice, so hosts find two screens without a hidden setting.

DECIDED BY THE OWNER, 14 OCTOBER

3. Review labels

Three labels, for comments and late items: "Reviewed with the room" (shown on the wall), "Reviewed by the host", "Not reviewed". Not-reviewed items are in the report by default; the host can leave them out.

PROPOSED, PENDING THE OWNER

4. How long after the session ends can people add comments or late answers?

Comments until 24 hours after the end, with a host button "Close comments" to end it sooner. A late answer to a round is accepted only while the session is running.

PROPOSED, PENDING THE OWNER

5. Should late answers ever reach Workie's read?

Not by default. They are listed beside the read, not in it. A host who wants them in presses Redo; the redone read includes them and says so in a line.

PROPOSED, PENDING THE OWNER

6. Offer "Ask the room" when Workie made no suggestions?

Yes: offer the blank composer whenever questions for the room are switched on for that environment. The switch itself stays as it is.

PROPOSED, PENDING THE OWNER

7. Replace "Request feedback" with the "Comments" kind inside Ask the room?

Yes. One door for asking the room anything. The composer states the difference: comments carry names; Ideas, Choose and Rate are anonymous.

PROPOSED, PENDING THE OWNER

8. Mid-read "Start round 3": a second press while questions are unsent, or move it into the session menu?

The second press. It keeps today's tap count for a host who wants to move on, and stops the accidental skip the reviewer hit in rounds 3 and 6.

PROPOSED, PENDING THE OWNER

9. Which settings may change while the room is live?

Session name and room screen: at once. Categories, question picks and round count: from the next round. The live question, its answers and its ballots: never from Settings. A future "reopen" would be its own act that says what it does to answers already in.

Raised by the owner's updated spec.

PROPOSED, PENDING THE OWNER

10. On one screen, may the host look at other steps on the projected laptop?

No. On one screen the strip only explains a step, because a private view would be on the wall. Looking happens on the Remote. If the host has no Remote, Setup and Settings open as today, and the room sees them.

PROPOSED, PENDING THE OWNER

11. Can the host ever see who sent an anonymous comment?

No. The name is not stored with the comment, so the host, the wall and the report cannot show it. Membership is still checked when it is sent, so only people in the room can post.

PROPOSED, PENDING THE OWNER

12. If the host turns on anonymous feedback partway through, what happens to comments already sent with names?

They become anonymous on the wall and in the report from then on; the names stay with the comments, so turning it off again restores them. Comments the writer sent anonymously stay anonymous whatever the host does.

PROPOSED, PENDING THE OWNER

13. In a round that hid names, do earlier-round views and comment lines hide them too?

Yes. Responses read "Response 3", comment lines "[Jake commented on Response 3]". The commenter's own name still follows the feedback setting.

PROPOSED, PENDING THE OWNER

14. Do participants see the review labels?

No. Labels are the host's bookkeeping and the report's. Participants see the comments, never whether the host has reviewed them.
